About This Game

Splice is an experimental and artistic puzzler. Immerse yourself in its microbial world and start splicing! Every level ("strand") consists of a number of cells that you will need to rearrange into a target structure in several moves ("splices"). Exploration and experimentation are key in determining how the curious little cells react to each other. Predict the sequence of splices you'll have to make in order to successfully arrange each strand. Re-sequence, mutate, and splice your way through this unique puzzle experience, and you'll exercise your ability to visualize sequential series of shapes over time. Solve your way to the final strands and you'll be left with a heady sense of mental accomplishment!

Splice is the fourth title out of Cipher Prime Studios, and was the Best Puzzle Game winner of the 2011 Intel Level Up contest.

Key Features:

- **75+ Puzzles:** The main sequences introduce the player to the game's basic mechanics and the epilogue sequences challenge the player's mastery of the game.

- **Absorbing Soundscape:** Put your headphones on and lose yourself in Splice's hauntingly beautiful and Glass-ian piano music.

Great game!. Although there is a logic to this game, it's not obvious and can be frustrating at times. After playing through the first few levels I've found that although it can be a relaxing chilled game (when not frustrating), it's neither really challenging nor much fun.

I'll be taking advantage of the Steam returns policy on this one.. Experimental & artistic puzzles; Every level have number of cells to rearrange into a target structure by limited several moves.

Solve your way to the final stages and you'll be filled with mental accomplishment.

+++ Graphics & Atmosphere of the game are crazy marvelous.

++ Smart level Ideas.

- The only negative point; there is little explanation on the beginnings.. Nice puzzle game, good music. I think the reviews and video pretty much cover everything you will get out of this game. Would be great if it came out for smartphones but enjoyable on PC all the same.. The most relaxing puzzle game I have ever played. The menus and style in this game are so polished and unique. Just great.. This game uses Google Analytics without asking for consent nor giving an option to disable this.. Although there is a logic to this game, it's not obvious and can be frustrating at times. After playing through the first few levels I've found that although it can be a relaxing chilled game (when not frustrating), it's neither really challenging nor much fun.

I'll be taking advantage of the Steam returns policy on this one.. Great binary trees game!

Can be hard at times but very fun!. Good for a little casual brain time.. Aesthetic, simplistic style challenging puzzler that serenades you with emotionally evocative piano solos as you gene-splice yourself angelic sequences. Brilliant stuff.. Don't download this game if you're stupid. the reason I have it is because I'm smart obviously.... One of the most beautiful games I've ever seen - the graphics, music and UI are all very well done. The concept of this puzzle game is interesting as well and I highly recommend it.. Such a Good Game :D Good for those who find Science Interesting. Reminds me of my time spent in microbiology: an abundance of cells doing strange and puzzling things. Splice is a very good puzzle game and I recommend it. Every sequence has a new "mechanic" that makes the puzzles increasingly difficult. Very enjoyable and it even has the extra challenge to get "ANGELIC" (Finish the level with the possibility to make more moves) on some levels.. Just because you liked the demo doesn't mean you'll like the game... Not really that great, although the style is kinda nice.
